PLANTING TOOL TRANSPUTKI

Designed to make it easier, faster and less expensive to plant container raised seedlings into prepared planting sites. Planting output per person is significantly improved as there is no bending or back strain.

Planting depth is adjustable with a spanner to set the depth limiter.

Loose seedlings can be carried in the kidney shaped hip positioned plastic box supplied with it's carrying harnesses.

To use, simply press the (Closed Beak) into the prepared ground. Step onto the beak opener peddle then grasp a seedling and place it into the planting tube for it's free fall. Lift the tool away from the "planted seedling" and heal (Firm) the surrounding soil. Press the beak closing trigger.

Transputki Planting Tools are practically maintenance free. Simply test the jaw opening function when fully opened, it should not exceed the internal diameter of the tube.

Spare parts are available.

LARGE KIDNEY SHAPED BLUE SEEDLING CARRYING BOX

Transputki #5

Inner diameter:
53 mm

Planting depths:
80-100 mm

Transputki #6

Inner diameter:
61 mm

Planting depths:
80-100 mm

Transputki #7

Inner diameter:
73 mm

Planting depths:
80-100 mm
